

Please download the pdf document in the resources section to view the emails you will need to investigate.

In your investigation of the emails, what signs did you find to indicate whether each email was malicious or safe? Give your opinion and analysis on these emails in this document, then upload it as your submission.

Here is an example to use as a reference point:

Example Answer (Please note this is not part of the Task and is an example only. Please remove this section from your task submission):

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none">• The attached URL is from Russia.• The email sender is requesting the user download a file with fairly generic justification.• This is enough indicators for us to assume that the link is probably malicious and should be treated as such.• Overall the email is not very professional. It is far too generic using terms that could apply to almost anyone and anywhere such as "the report" and the job title of "anz employee". Also 'anz' is not capitalized, and the email provided is not a business email.• The name the email uses isn't consistent with the display name.

- Finally the email tries to instill a sense of urgency and dread by mentioning that the person's job is on the line, and mentioning their bosses to provide some sort of authority to what they are saying. This is a common form of social engineering.

Email 1:

Is this email Safe or Malicious?	My Analysis
Safe	<ul style="list-style-type: none"> • No attachment found • The email is about movie trailer discussion

Email 2:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none"> • External link found asking to singup • Microsoft doesnt ask you to sign up for one file • Email seems to be a phising mail • DO NOT open the link and sign up • Customer heading is not present • To validate, visit the official websoite of office 365

Email 3:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none"> • Looks like a generic email asking to check facebookis working or not, but the 'b' of facebook is not the correct format. • Looks like a phising email • Tty to login in through the offical website of facebook • The URL has an extension of ".opt" • Do not respond to such emails

Email 4:

Is this email Safe or Malicious?	My Analysis
Safe	<ul style="list-style-type: none"> • A forwarded email by Adam Markus • The email content is advertising the Gaming Headset

Email 5:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none"> • The message seems like genuine as=nd asking for help • The Sender is asking for login credentials/ user account details and this is enough to indicate this is a phishing email • No FBI agent reveal their identity over a mail

Email 6:

Is this email Safe or Malicious?	My Analysis
Safe	<ul style="list-style-type: none"> • This mail looks like a professional email • No links or attachments • The email id has the company domain name and the company logo • This is enough to validate the sender and conclude this is as a safe mail

Email 7:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none"> • The email looks like a Ad. • The email is not in proper format doesnot have a subject or a proper body • The mail contains links which has a php extension which means that this is a part of unknown website • The name the email uses isn't consistent with the display name • This is enough to justify that the email is malicious
